IP GATEWAY

GMS GATEWAY

FXS GATEWAY

FXO GATEWAY

■ An IP gateway is a device that acts as a bridge between different networks and provides connectivity between them IP Gateways are used in different applications as:

- Bridging an ip network to a traditional telephone network
- Connecting an IP network to the internet.
- connecting multiple IP networks

VIDEO CONFERENCE SOLUTIONS

Components of our Video Conference Solution:

1 Video conference software: This is the software that allows you to connect with other participants and share video and audio. Some popular video conferencing software options include Zoom, Google Meet, and Microsoft teams.

2 Video conference Hardware may include

Video Phone

IP Camera

Speakers

Microphones

Interactive Screen

Computer Device

THE ABOVE ITEMS COULD BE FOUND AS A SEPARATE DEVICE OR AS A BUILT-IN FEATURE WITH OTHERS IN ONE DEVICE.

There are many devices and solution design ways that reach the same purpose however, the best is selected through the definition of:

Industry

The Purpose of use

Size of room

Preferred video conference software

Integrations

Targeted budget

Number of participants

Required features

CALL CENTER

A Solution that helps organizations manage their inbound & outbound calls.

It can be used to handle customer service inquiries, sales leads and other types of calls. Call centre solutions typically include features such as calling routing, voice mail, and reporting.

We provide our customer with different types of call center solutions, including:

1. **On-site Call center solutions:**

means that all software, hardware and data are located in the business's own premises, and provides more security and control.

2. **Cloud-based call center solutions:**

A call center that uses the cloud deliver its services. Call center software, hardware, and data are hosted on remote servers.

3. **Hybrid call center solutions:**

A combination of an on-site call center and a cloud-based call center. This type of solutions can offer the best of both worlds.

The solution is composed of hardware including:

Cameras

Sensors

Switches & Controllers

Dimmer

Mechanical
(Door lock)

Application

Embrace the Advantages of Smart Automation:

Cost
reduction

Controlling
energy bills
